

POS System Development Recap – Jan 25, 2026

Current System Summary

UI & Flow (frmPOS + frmFindItem)

- frmPOS main screen built with:
 - lstItems, lstScan, txtSubtotal, txtTax, txtTotal, txtChange
 - cmbPaymentType for Cash, Credit, Card (auto-loaded on form init)
 - Buttons wired: Find, Pay, Print, Daily Backup
 - frmFindItem:
 - Pulls items from Sheet_Items with descriptions and prices
 - Pushes item data back to frmPOS including price and quantity
 - Totals update dynamically per item selection
-

Data Structure

Sheet_Items

- Static product master list
(Item, Description, Price)

Sheet_Transactions

- Dynamic transaction log
Columns:
 - Timestamp, Item, Price, Qty, Subtotal, Tax, Total, Pay Type, Tendered, Change
-

Reports Created

1. Tax Report

- Exports to PDF

- Shows total sales and tax collected
- Includes:
 - Header: *Orchid Shop - Mimi's Café / Cyber-Range POS*
 - Footer: *Generated by: Lab User*

2. Cash Flow Report

- Exports to PDF
- Includes:
 - Sales Breakdown by Pay Type
 - Cash Received and Credit amounts shown
 - Placeholder for future **Visa/Mastercard** expansion

3. Daily Backup Summary

- Professional layout with:
 - Business Header
 - Description text
 - Transaction table for **TODAY()**
 - Totals: Item count, Sales, Tendered, Change
 - PDF named: `OS_MM-DD-YYYY_####_DailyBackup.pdf`
- Format mirrors a real production financial audit

Improvements & Fixes Completed

- Fixed `UserForm_Initialize` bug for payment type combo box
- Structured the transaction summary layout
- Used `PageSetup` to prevent PDF clipping 
- Formatted table headers with color, borders, alignment

Next Steps & Expansion Plan

1. Card Type Identification

- Plan to split "**Credit**" into:
 - Visa, MasterCard, Discover, Amex, etc.
- Implement via:
 - Second dropdown after selecting Credit
 - Or smart detection based on terminal inputs (future)

2. **Automated Backup Storage**

- Optionally store backups in:
 - Date folders (e.g. /Reports/2026-01-25/)
 - Or zip/archive at end of week

3. **Test Data Generator (Optional)**

- Script to populate fake transactions for test days
- Simulate peak loads, card types, tender ranges

4. **Receipt Format Upgrade**

- Branded ticket-style receipt PDF output
- Thermal-print version support if desired
